

End-to-End Azure Web App Deployment

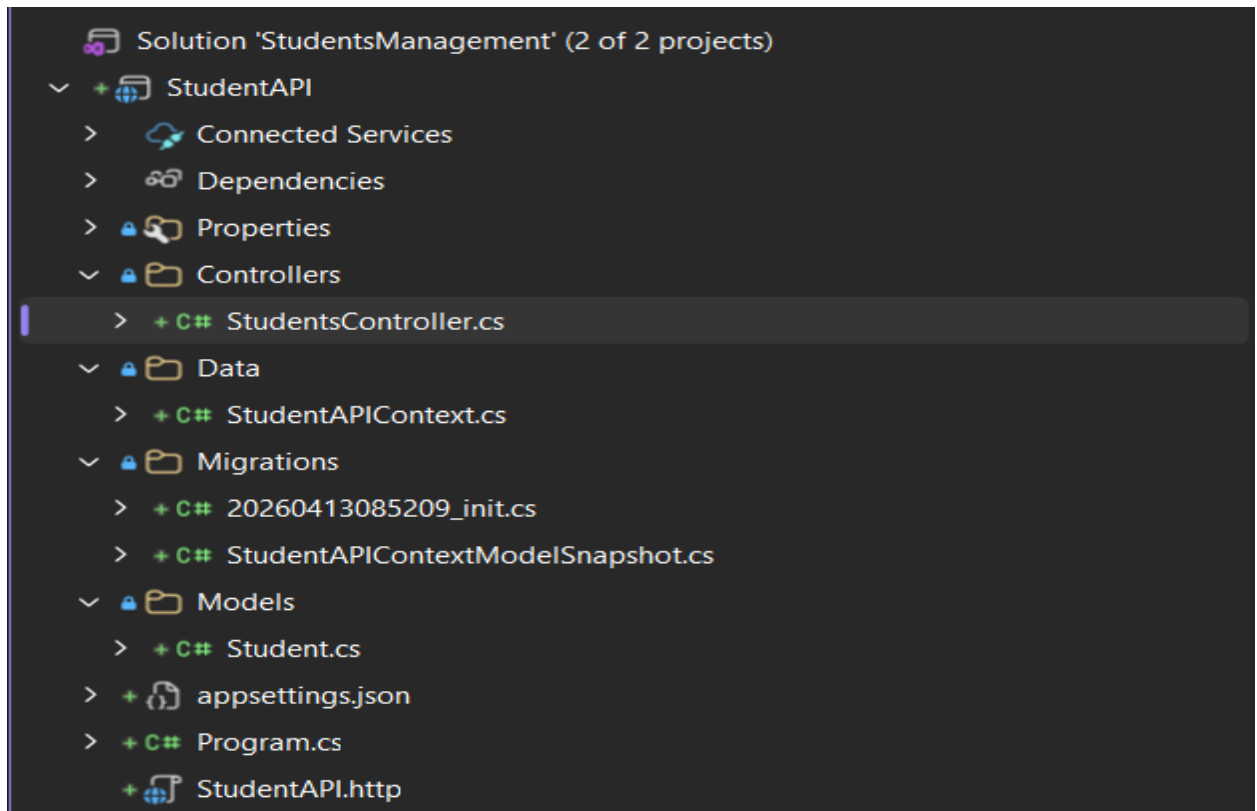

1. Resource Group Created

The screenshot shows the Microsoft Azure portal interface. The main heading is "Resource Manager | Resource groups". Below the heading, there is a search bar and a list of resource groups. The table below shows the details of the resource groups.

Name	Subscription	Location
DefaultResourceGroup-SE	Azure for Students	Korea Central
rgweb-azure	Azure for Students	Korea Central
VisualStudioOnline-72D4D1409DD749A8B3DF46C6D8933FC4	Azure for Students	South India

2. Web API Project Structure

The screenshot shows the Visual Studio solution explorer for a project named "StudentsManagement". The project structure is as follows:

- Solution 'StudentsManagement' (2 of 2 projects)
 - StudentAPI
 - Connected Services
 - Dependencies
 - Properties
 - Controllers
 - StudentsController.cs
 - Data
 - StudentAPIContext.cs
 - Migrations
 - 20260413085209_init.cs
 - StudentAPIContextModelSnapshot.cs
 - Models
 - Student.cs
 - appsettings.json
 - Program.cs
 - StudentAPI.http

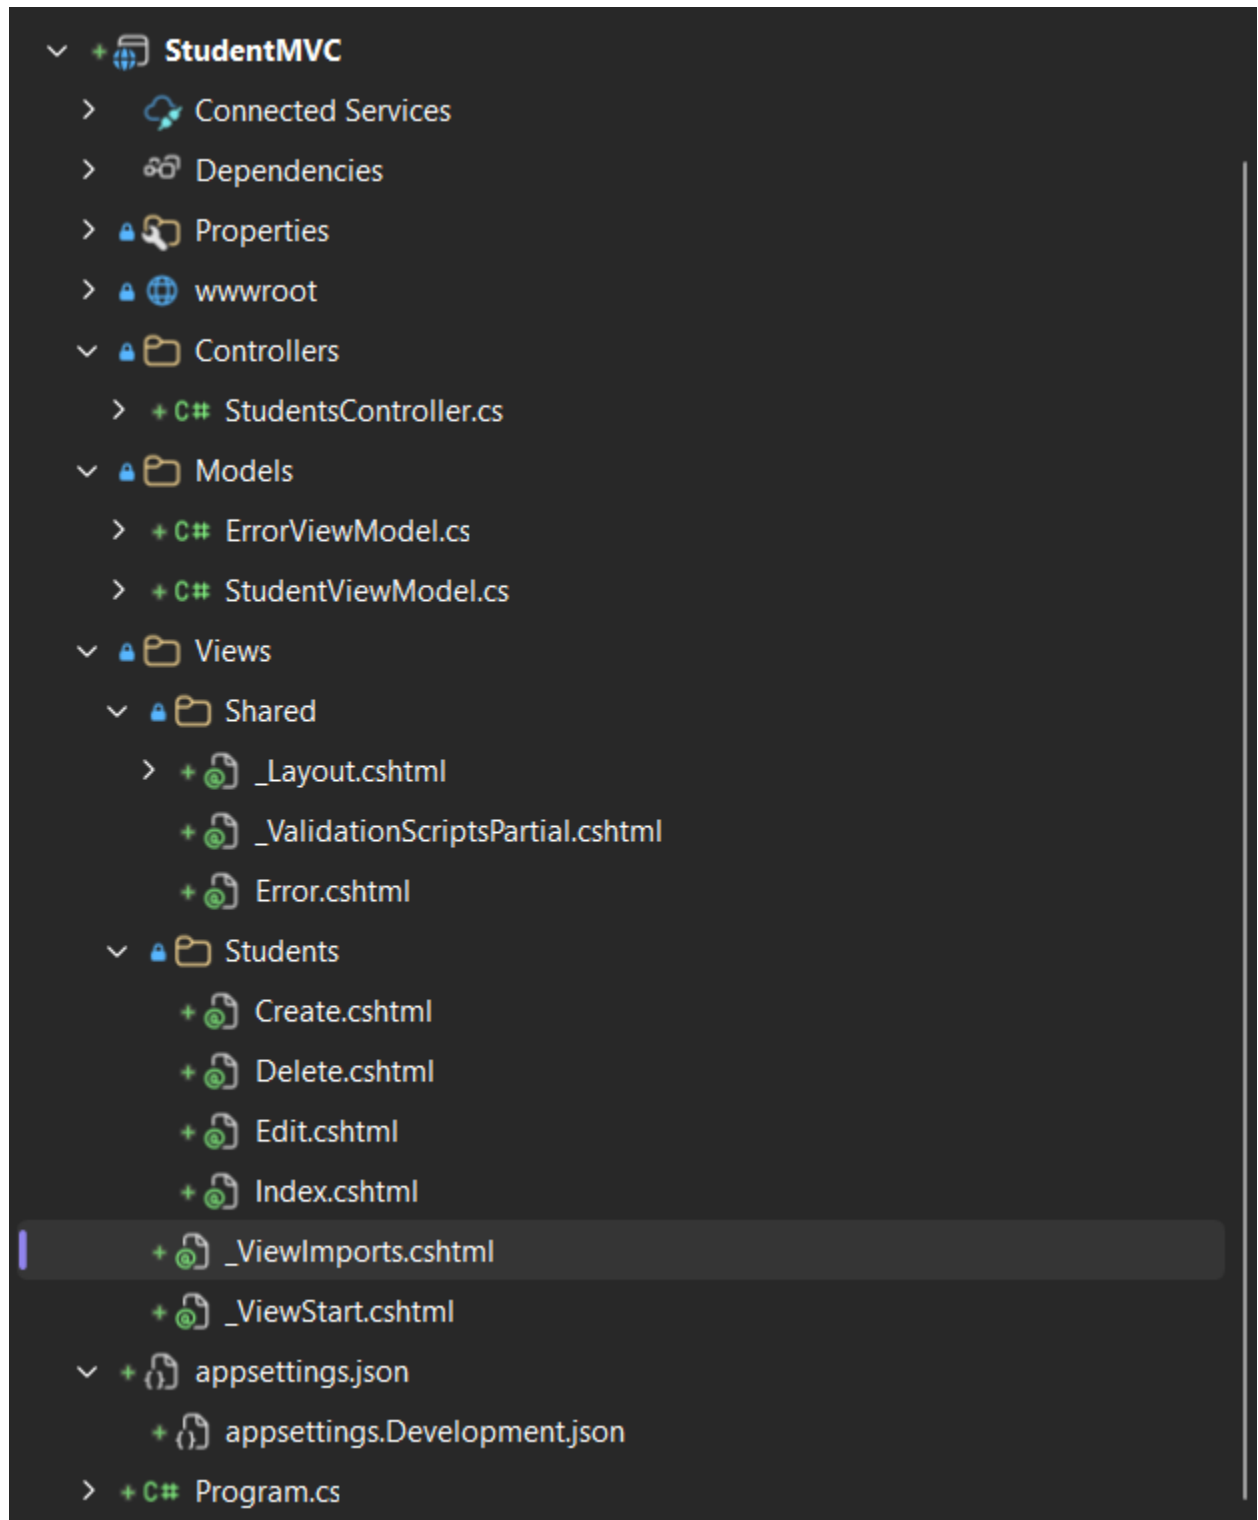

3. Azure SQL Database Created

The screenshot displays the Azure portal interface for a newly created SQL database. The left-hand navigation pane shows the 'SQL databases' section under 'All resources'. The main content area is titled 'azureAPI (backendapi/azureAPI)' and includes a search bar, a list of actions (Copy, Restore, Export, Set server firewall, Delete, Open in, Feedback), and a 'JSON View' link. The 'Overview' tab is selected, showing essential information such as the Resource group (rgweb-azure), Server name (backendapi.database.windows.net), Status (Online), Location (Korea Central), Subscription ID (c731b836-e1b5-48b9-90e8-8567973c29f9), and Subscription ID (c731b836-e1b5-48b9-90e8-8567973c29f9). A 'Getting started' section at the bottom provides instructions on how to connect to the database.

4. Web API App Service

The screenshot displays the Azure portal interface for a newly created Web App. The left-hand navigation pane shows the 'Web App' section under 'All resources'. The main content area is titled 'student-api-app' and includes a search bar, a list of actions (Browse, Stop, Swap, Restart, Delete, Refresh, Download publish profile, Reset publish profile, Share to mobile, Send us your feedback), and a 'JSON View' link. The 'Overview' tab is selected, showing essential information such as the Resource group (rgweb-azure), Status (Running), Location (Korea Central), Subscription ID (c731b836-e1b5-48b9-90e8-8567973c29f9), and Subscription ID (c731b836-e1b5-48b9-90e8-8567973c29f9). A 'Properties' section at the bottom provides details about the Web app, including the Name (student-api-app), Publishing model (Code), Runtime Stack (Dotnet - v8.0), and Default domain (student-api-app-...). The 'Deployment Center' section shows the deployment logs and the last deployment status.

5. MVC Project Structure

6. MVC App Service

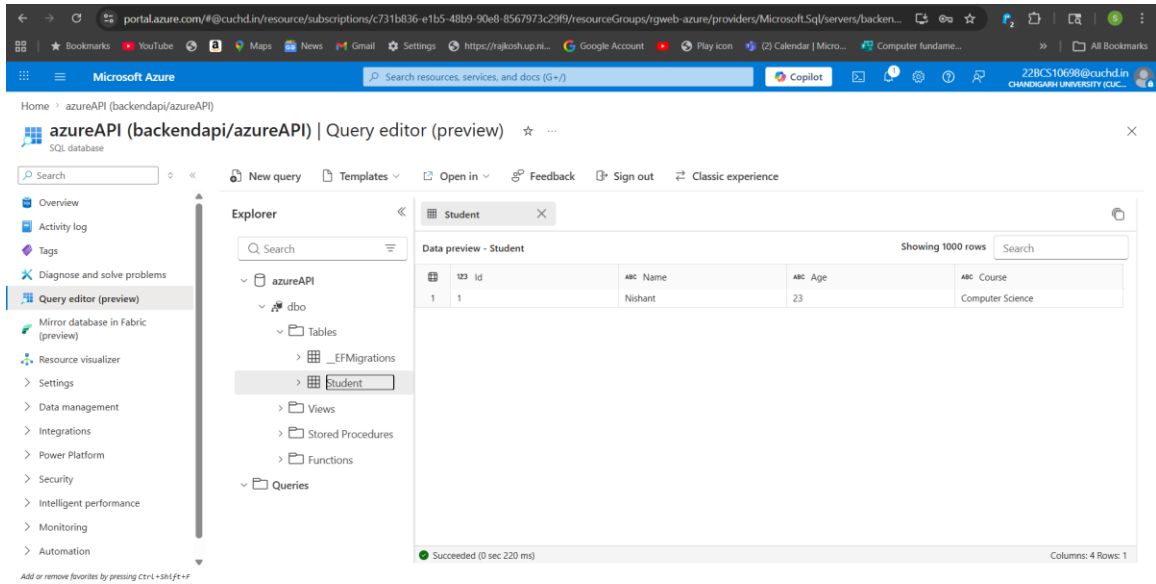

The screenshot shows the Microsoft Azure portal interface for a Web App named 'student-mvc-app'. The left sidebar contains navigation options like Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Microsoft Defender for Cloud, Events (preview), Log stream, Resource visualizer, Deployment, Deployment slots, Deployment Center, Settings, Performance, App Service plan, and App Service plan. The main content area displays the 'Essentials' section with various properties and tabs. A notification at the top suggests using Azure Front Door. The 'Properties' tab is active, showing details like Resource group (rgweb-azure), Status (Running), Location (Korea Central), Subscription (Azure for Students), and Subscription ID. Other tabs include Monitoring, Logs, Capabilities, Notifications (1), and Recommendations. The 'Web app' section shows Name (student-mvc-app), Publishing model (Code), and Runtime Stack (Dotnet - v8.0). The 'Domains' section shows the Default domain (student-mvc-app-fxauhcb4hdbqgtdt.koreacentral-01.azurewebsites.net). The 'Deployment Center' section shows Deployment logs, Last deployment, and Deployment provider (None). The 'Application Insights' section shows the Name (student-mvc-app).

7. MVC App Service

The screenshot shows the StudentMVC application running in a web browser. The URL bar displays 'student-mvc-app-fxauhcb4hdbqgtdt.koreacentral-01.azurewebsites.net/Students'. The page title is 'StudentMVC Home'. Below the title, there is a section titled 'Students List' with an 'Add Student' button. A table displays the list of students:

ID	Name	Age	Course	Action
1	Nishant	23	Computer Science	Edit Delete
