

The Hierarchy Query: “Tree of Work Items”

The screenshot shows the Azure DevOps interface for a project named 'SmartBank'. The left sidebar contains navigation options: Overview, Boards, Backlogs, Sprints, Queries (selected), Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Project settings. The main area is titled 'Queries > My Queries' and displays a table of work items. The table has columns for ID, Work Item Type, Title, Assigned To, and State. The work items are organized into a hierarchy, with some items expanded to show their children. For example, 'User Authentication & Profile Management' (Epic) is expanded to show 'Social Media Login' (Feature), which is further expanded to show 'As a user, I want to log in using Google, so that I can quickly acce...' (User Story). This user story is expanded to show three tasks: 'Design database schema', 'Develop API endpoint', and 'Write unit tests'. Other work items include 'User Profile Dashboard' (Feature) and 'As a user, I want to log in using Facebook, so that I can access m...' (User Story), each with its own set of tasks. The right sidebar shows a detailed view of the selected work item, 'Design database schema' (Task 8), including its state, reason, area, iteration, and description.

ID	Work Item Type	Title	Assigned To	State
1	Epic	User Authentication & Profile Management		New
2	Feature	Social Media Login		New
4	User Story	As a user, I want to log in using Google, so that I can quickly acce...	Shashank Chauhan	Active
8	Task	Design database schema		New
9	Task	Develop API endpoint		New
10	Task	Write unit tests		New
5	User Story	As a user, I want to log in using Facebook, so that I can access m...		New
11	Task	Design database schema		New
12	Task	Develop API endpoint		New
13	Task	Write unit tests		New
3	Feature	User Profile Dashboard		New
6	User Story	As a user, I want to view my profile details, so that I can check my...	Shashank Chauhan	New
14	Task	Design database schema		New
15	Task	Develop API endpoint		New
16	Task	Write unit tests		New

The Backlog View:

The screenshot shows the Azure DevOps interface for the 'SmartBank Team' backlog. The left sidebar is the same as in the previous screenshot. The main area is titled 'SmartBank Team' and displays a list of work items in a backlog view. The table has columns for Order, Work Item Type, Title, State, Effort, Business Value, and Tags. The work items are listed in a single column, with some items expanded to show their children. For example, 'User Authentication & Profile Management' (Epic) is expanded to show 'Social Media Login' (Feature), which is further expanded to show 'As a user, I want to log in using Google, so that I can ...' (User Story). This user story is expanded to show three tasks: 'Design database schema', 'Develop API endpoint', and 'Write unit tests'. Other work items include 'User Profile Dashboard' (Feature) and 'As a user, I want to log in using Facebook, so that I ca...' (User Story), each with its own set of tasks. The right sidebar shows a detailed view of the selected work item, 'Design database schema' (Task 8), including its state, reason, area, iteration, and description.

Order	Work Item Type	Title	State	Effort	Business Value	Tags
1	Epic	User Authentication & Profile Management	New		Business
